solar thermal conversion p0059 A82-16745	Pormation evaluation in liquid-dominated geothermal reservoirs
LENS DESIGE	[DOE/ET-28384/T1] p0109 N82-12514
Efficiency of Fresnel lenses	LIQUID PUBLS
p0043 A82-11387	U.S. Department of Energy liquid synfuels overview
LIFE CYCLE COSTS A hidden advantage of permanent magnet electrical	p0090 A82-12531 Peasibility of solar assisted ethanol production
generating systems	[AIAA PAPER 81-2533] p0054 A82-14004
p0122 A82-11720	Liquid hydrogen - An outstanding alternate fuel
The effect of concentrator field layout on the	for transport aircraft p0085 A82-17290
EE-1 small community sclar power system p0048 A82-11799	Application of solar power satellites to India's
LIPE SCIENCES	energy needs - A macroengineering solution to a
Health and safety research division	macroproblem
[DE81-026088] p0026 N82-13652	p0062 A82-18645
A first order mathematical model of the lift/drag	Catalyst and reactor development for a Liquid-phase fischer-tropsch process
characteristics of aerofoil sections	[DE81-028209] p0099 N82-11168
p0130 A82-14357	LIQUID HYDROGEN
An indoor blade test facility for determining the	Puel for future transport aircraft
basic aerodynamic properties of Darrieus wind turbine airfoils with test results for an NACA	[ASME PAPER 81-HT-80] p0089 A82-10965 A LH2 engine fuel system on board - Cold GH2
0015 and a modified section	injection into two-stroke engine with LH2 pump
p0136 N82-10005	[ASME PAPER 81-HT-81] p0083 A82-10966
LIGHT AIRCHAFT	Liquid hydrogen for automotive vehicles -
Wing design for light transport aircraft with	Experimental results
improved fuel economy p0004 A82-14416	[ASME PAPER 81-HT-83] p0083 A82-10968 Technological innovation for success - Liquid
LIGHT TRANSMISSION	hydrogen propulsion
Efficiency of Fresnel lenses	p0084 A82-16734
p0043 A82-11387	Liquid hydrogen - An outstanding alternate fuel
LIGHT WATER REACTORS Potential contribution of currently operating	for transport aircraft p0085 182-17290
nuclear-fueled electric-generating units to	Hydrogen as carrier of secondary energy: Proposal
reducing OS oil consumption	for a research and development program
[DE81-030497] p0031 N82-15553	[DFVLR-MITT-81-10] p0087 N82-15542
LIGHTING EQUIPARET Appliance efficiency and the solar building	LIQUID HETALS Liquid-metal MHD for solar and coal
[DE81-029073] p0075 H82-13265	[DE81-023545] p0137 H82-10553
LIGHTHING SUPPRESSION	LIQUID PHASE EPITAXY
Lightning protection for wind turbine electronics	Gals solar cells for space application
[AIAA PAPEE 81-2571] p0129 A82-14028 Lightning protection for ccmposite rotor blades	p0046 A82-11766
of windrowered turbines	
-0432 102 47424	

p0133 A82-17631

LIQUID WASTES	MAGNETIC DISPERSION
Chemical element concentrations in liquids and solids associated with power plants using PGD	Selective separation of coal feedstocks for
solids associated with power plants using FGD	conversion by magnetic separation techniques [DE81-028060] p0108 B82-12263
Systems	MAGNETIC FIELD COMPIGURATIONS
LIQUID-VAPOR EQUILIBRIUM	Nonlinear development of magnetic reconnection in
Measured performance of falling-jet flash	the tearing-type and the Petschek-type field
evaporators	geometries
[DE81-024355] p0161 E82-10565 LITEIUM PLUORIDES	p0132 A82-17015 HAGERTIC INDUCTION
Rechargeable lithium/vanadium oxide cells	Wind-energy recovery by a static Scherbius
utilizing 2Me-THF/LiAsP6	induction generator
p0154 Ad2-15726	
LITHIUM SULFUR BATTERIES	MAGNETIC SURVEYS
Insoluble sulfide positive electrodes for organic	Geophysical survey, Paso Robles geothermal area, California, part of the resource assessment of
electrolyte lithium secondary batteries p0155 A82-15727	
Recent progress in lithium/iron sulfide battery	resource areas in California
development	[DE81-026038] p0109 N82-12517
[DB81-023127] p0157 M82-10557	
Practure flow of groundwater in coal-bearing strata	area of the Central European rift system [BMFT-FB-T-81-111] p0119 N82-15656
[DE81-023810] p0096 M82-10479	
Geologic considerations in underground coal mining	Selective separation of coal feedstocks for
system design	conversion by magnetic separation techniques
[NASA-CR-164961] p0104 N82-11516	
Formation evaluation in liquid-dominated geothermal reservoirs	MAGNETOHYDRODYNAMIC GENERATORS Correlation between results of zone method and
[DOE/ET-28384/T1] p0109 H82-12514	experiment in radiative heat transfer
Stratigraphy and depositional history of the Iola	[ASME PAPER 81-HT-71] p0121 A82-10958
Limestone Upper Pennsylvanian (Missourian),	[ASME PAPER 81-HT-71] p0121 A82-10958 Advances in coal fired MHD generator research n0126 A82-11853
Northern Midcontinent U.S. p0116 N82-14711	Format and triver
LOAD DISTRIBUTION (FORCES)	p0126 A82-11854
Load-change testing of a large commercial oxygen	Flow aerodynamics modeling of an MHD swirl
=1 4	combustor - Calculations and experimental
[BPRI-NP-1824] p0096 N82-10275	
LOAD TESTS Regional load-curve models: Scenario and forecast	p0127 A82-12113 Ionization waves in an argon discharge in a
using the DRI model	longitudinal gas flow
[DE81-904192] p0033 N82-15605	
LOADS (FORCES)	Increasing power and efficiency by dynamic
An overview of fatigue failures at the Rocky Flats	suppression of ionization instability in a plasma
Wind System Test Center p0125 A82-11828	p0127 A82~12897 Assessment of MHD power plants with coal
LOGISTICS	qasification
The all electric airplane - Its development and	[AIAA PAPER 81-2574] p0129 A82-14030 A design for an MHD power plant as a prime mover
logistic support	A design for an MHD power plant as a prime mover
p0004 A82-14709	for a Naval Vessel [AIAA PAPER 81-2575] p0129 A82-14032
LONG TRRM EFFECTS Long-term performance of the Hunn passive solar	
residence	existing coal-fired plants
[DE81-028735] p0070 N82-11600	Problems and potential for MHD retrofit of existing coal-fired plants [AIAA PAPER 81-2586] p0130 A82-14036
LOW COST	Industrial applications of MHD high temperature
Low-cost solar flat-plate-collector development	air heater technology [AIAA PAPER 81-2588] p0130 A82-14037
[DE81-025081] p0070 N82-11584	End region and current consolidation effects upon
The effect of shielding on the aerodynamic	the performance of an MHD channel for the ETF
performance of Savonius wind turbines	conceptual design Engineering Test Facility
p0125 A82-11826	
LOW TREPERATURE Effects of low temperature periodic annealing on	Optical diagnostic techniques for coal-fired MHD applications
the deep-level defects in 200 keV proton	[AIAA PAPER 82-0377] p0135 A82-17913
irradiated AlGaAs-GaAs solar cells	MHD coal combustor development
p0061 A82-18287	
LOW TRMPERATURE ENVIRONMENTS Experimental study of fuel heating at low	MHD generator scaling analysis for baseload , commercial power plants
temperatures in a wing tank model, volume 1	[AIAA PAPER 82-0394] p0135 A82-17922

MICROWAVES SUBJECT INDEX

The history of the development of the rectenna p0149 N82-12560	Extensible bridge-conveyor concepts for coal-mine face haulage
Rectenna system design	[DE81-031974] p0146 N82-12525
p0149 N82-12561 Rectenna session: Micro aspects	Longwall mining of thin seams [DE81-028042] p0116 N82-14612
p0149 N82-12562	MINUESOTA POTTO NOZ 14012
A theoretical study of microwave beam absorption	Wood resources and utilization patterns in the North Central Region and energy needs for the
by a rectenna p0149 N82-12563	manufacture of wood products
Rectenna array measurement results p0149 N82-12564	[DE81-030356] p0019 N82-12604 Development of peatlands in northern Minnesota
Session on solid state: Introduction	[DE82-000873] p0112 N82-13475
p0149 N82-12565 Modified reference SPS with solid state	MINORITY CARRIERS Dependence of minority carrier diffusion length on
transmitting antenna	illumination level and temperature in single
p0149 N82-12566 SPS solid state antenna power combiner	crystal and polycrystalline Si solar cells p0053 A82-13804
p0149 N82-12567	Effect of junction depth on the performance of a
Solid-state retrodirective phased array concepts for microwave power transmission from Solar	diffused n/+/p silicon solar cell p0056 A82-15444
Power Satellite	A method for experimental assessment of the
p0149 N82-12568 Effects of the Satellite Fower System on low Earth	shifting approximation, with application to polysulicon solar cells effect of constant
orbit and geosynchronous satellites	series resistance
[PB81-232019] p0150 N82-13157 HICROWAYES	p0058 A82-16131
Chronic exposure of a honey bee colony to 2.45 GHz	Solar mirror materials - Their properties and uses
continuous wave microwaves p0003 A82-14347	in solar concentrating collectors
HILITARY AIR FACILITIES	The effect of soiling on solar mirrors and
Geothermal-resource verification for Air Porce Bases [DB81-027482] p0112 N82-13520	techniques used to maintain high reflectivity p0037 A82-10013
MILITARY SPACECRAFT	Fundamental limits to the spectral selectivity of
Thermionic application for future air force space power systems	<pre>composite materials for absorbing solar radiation</pre>
p0124 A82-11822	p0038 A82-10015 Composite film selective-absorbers for solar
Ethanol production in southern tier east region of	radiation collection
New York: Technical and economic feasibility [PB81-226979] p0011 N82-11275	p0038 A82-10016 Investigation of abrasive action of atmospheric
HINERAL DEPOSITS	particles on the reflectance of mirrors
Geology of the nahcclite deposits and associated oil shales of the Green River Poination in the	p0040 A82-10388 Hathematical simulation model for the operation of
Piceance Creek Basın, Colorado	the optical system of a solar power station
p0105 N82-11683	p0053 A82-13718 Fracture mechanics of cellular glass
Planning a comprehensive program for exploration of the anthracite deposits of the Narragansett	[NASA-CR-164959] p0066 N82-11209 Secondary and compound concentrators for parabolic
Basin of Massachusetts and Bhode Island, phase 1	dish solar thermal power systems
and 2 [DR81-028490]	[NASA-CR-164960] p0068 N82-11550
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping	Low-cost mirror concentrator based on inflated, double-walled, metallized, tubular films
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Hyoming; Cubeza	Low-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Nyoming; Cubeza Prieta, Arizona, and Yellowstone National Park [E82-10011] p0118 N82-15489	LOW-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551 HIS (SEMICOMDUCTORS) Temperature dependence of the short-circuit
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Myoming; Cubeza Prieta, Arizona, and Yellowstone National Park [E82-10011] p0118 N82-15489 Design and economics of direct-contact salt	LOW-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551 MIS (SENICOBDUCTORS)
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Hyoming; Cubeza Prieta, Arizona, and Yellowstone National Park [E82-10011] p0118 N82-15489 Design and economics of direct-contact salt hydrate storage systems [SERI/TP-631-1163] p0160 N82-15558	LOW-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551 MIS (SENICOEDUCTORS) Temperature dependence of the short-circuit current in MIS solar cells p0052 A82-12825 A pinhole model for metal-insulator-semiconductor
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Wyoming; Cubeza Prieta, Arizona, and Yellowstone National Park [E82-10011] p0118 N82-15489 Design and economics of direct-contact salt hydrate storage systems [SERI/TP-631-1163] p0160 N82-15558 MINERAL METABOLISM Biogeochemical evidence for subsurface hydrocarbon	LOW-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551 MIS (SEMICOMDUCTORS) Temperature dependence of the short-circuit current in MIS solar cells p0052 A82-12825
[DE81-028490] p0104 N82-11519 Geologic applications of thermal-inertia mapping from satellite Powder River, Nyoming; Cubeza Prieta, Arizona, and Yellowstone National Park [E82-10011] p0118 N82-15489 Design and economics of direct-contact salt hydrate storage systems [SERI/TP-631-1163] p0160 N82-15558 MIMERAL METABOLISM Biogeochemical evidence for subsurface hydrocarbon occurrence, recluse oil field, Nyoming:	LOW-cost mirror concentrator based on inflated, double-walled, metallized, tubular films [DE81-027813] p0081 N82-15551 MIS (SEMICOMDUCTORS) Temperature dependence of the short-circuit current in MIS solar cells p0052 A82-12825 A pinhole model for metal-insulator-semiconductor solar cells p0056 A82-15442 Effects of double-exponential current-voltage

0	Plan for technological research and development related to the petroleum activities on the
A44888	Norwegian Continental Shelf. 1981-1985:
OCCUPATION Properties and training inclinations of biomass	Appendixes: 1. Technical challenges. 2. Research requirements. 3. High priority programs
Education and training implications of biomass energy system use	[DE81-904014] p0104 N82-11520
[DE81-029956] p0028 N82-14664	Oceans and ocean currents: Their influence on
OCEAN BOTTOM	climate
Maritime support for ocean-resources development	[DE81-027263] p0016 H82-11731
[AD-A104730] p0111 N82-12735	Environmental assessment of the Alaskan
OCEAN CURRENTS	Continental Shelf: Annual reports of principal
Turbines in the ocean	investigators for the year ending March 1980. Volume 5: Hazards
p0132 A82-16844 Ocean energy-waves, currents, and tides	[PB81-225732] p0026 N82-13607
[DB81-025708] p0105 N82-11611	Offshore petroleum industry environmental data
Oceans and ocean currents: Their influence on	requirements: Emphasis on remote sensing
climate	p0027 N82-14557
[DE81-027263] p0016 N82-11731	The Seasat commercial demonstration program
OCEAH DATA ACQUISITIONS SYSTEMS	p0115 N82-14561
Relational methodology for integrating and	OFFSHORE REACTOR SITES
analyzing field test and research data	Alternate hybrid power sources for remote site
describing enhanced cil recovery [DB81-030441] p0118 #82-15508	applications [AD-AJ99471] p0024 N82-13512
OCEAH DYNAMICS	OHIO
The Seasat commercial demonstration program	Wood resources and utilization patterns in the
p0115 N82-14561	North Central Region and energy needs for the
OCEAN TEMPERATURE	manufacture of wood products
Experimental demonstration of the feasibility of	[DB81-030356] p0019 N82-12604
the Mist Flow Ocean Thermal Energy Process	OIL BEPLORATION
[AIAA PAPER 81-2596] p0136 A82-18220 OCEAN THRRNAL ENERGY CONVERSION	Development of organic geochemical and isotope techniques for hydrocarbon exploration
Small-scale uses and costs of hydrogen derived	[BMFT-FB-T-80-076] p0097 N82-10482
from OTEC ammonia	Plan for technological research and development
p0084 A82-11792	related to the petroleum activities on the
Review of electrochemical energy conversion and	Norwegian Continental Shelf. 1981-1985;
storage for ocean thermal and wind energy systems	Appendixes: 1. Technical challenges. 2.
p0126 A82-11832	Research requirements. 3. High priority programs [DB81-904014] p0104 N82-11520
Proposed 12.5 NWe shelf-mounted OTEC pilot plant	[DE81-904014] p0104 N82-11520 Blogeochemical evidence for subsurface hydrocarbon
for power, water and mariculture at St. Croix [AIAA PAPER 81-2546] p0127 A82-14011	occurrence, recluse oil field, Wyoming:
Alternative ocean energy products and hybrid	Preliminary results
geothermal-OTEC /GEOTEC/ plants	[USGS-CIRC-837] p0110 N82-12693
[AIAA PAPER 81-2547] p0128 A82-14012	Offshore petroleum industry environmental data
Proposed 10 MWe OTEC pilot plant for the	requirements: Emphasis on remote sensing
Commonwealth of the Northern Mariana Islands	p0027 N82-14557 Bibliography of publications dealing with tar sands
[AIAA PAPEE 81-2561] p0128 A82-14020 Florida's proposed OTEC pilot plant for Key West	[DE81-026146] p0115 N82-14594
[AIAA PAPER 81-2563] p0003 A82-14021	Geologic applications of thermal-inertia mapping
An estimate of OTEC costs, market potential and	from satellite Powder River, Wyoming; Cubeza
proof-of-concept Vessel financing	Prieta, Arizona, and Yellowstone National Park
[AIAA PAPER 81-2567] p0003 A82-14024	[E82-10011] p0118 N82-15489
OTEC ocean system development	OIL FIELDS
[AIAA PAPES 81-2590] p0130 A82-14038	Oil and gas industry and environmental pollution: Application of systems reliability analysis for
Turboexpanders for OTEC power plants [AIAA PAPER 81-2592] p0003 A82-14040	the evaluation of the status of environmental
Experimental demonstration of the feasibility of	pollution control in the Nigerian petroleum
the Mist Flow Ocean Thermal Energy Process	industry
[AIAA PAPER 81-2596] p0136 A82-18220	p0008 N82-10583
Overview and FY 1981 progress on open-cycle OTEC	Petroleum geology and resource assessment of the
power systems	middle Caspian Basin, USSR, with special emphasis on the Uzen field
[DE81-029277] p0144 N82-15580 OCEANGGRAPHIC PARAMETERS	[DE81-029951] p0104 N82-11518
Oceans and ocean currents: Their influence on	OIL POLLUTION
climate	Pollution of the soil by aviation gasoline

SUBJECT THDEX SILICON ALLOYS

SBMICOMDUCTOR JUNCTIONS Advanced high temperature thermoelectrics for space power	Exploration of coal and anthracitic carbonaceous shale resources, Narragansett Basin, Massachusetts, and Rhode Island
p0125 A82-11823 Current-voltage characteristics of	[DE81-030895] p0104 N82-11523 Pyrolytic characterization of the organic matter
semiconductor-electrolyte junction solar cells p0055 A82-15112 A new structure for a	in selected coals and in the Devonian shales of southern West Virginia p0113 N82-13578
semiconductor-insulator-semiconductor solar cell p0057 A82-15911	Byaluation of Devonian shale potential in eastern Kentucky/Tennessee
SENICONDUCTORS (MATERIALS) Heterojunctions for thin film solar cells p0039 A82-10024	[DE82-001164] p0116 M82-14595 SHBAR PLOW Performance testing of a Savonius windmill rotor
The use of semiconducting oxide ceramics in solar energy conversion	in shear flows p0125 A82-11827
p0059 A82-17099 Model based studies of sche optical and electronic properties of narrow and wide gap materials	Study of gelled LNG [DE81-023259] p0095 N82-10269 SHEAR LAYERS
p0062 A82-18471 SEPARATION	A two-dimensional study of the maximum power that can be obtained from a wind turbine in a wind
Selective separation of coal feedstocks for conversion by magnetic separation techniques [DE81-028060] p0108 N82-12263	shear layer [FFA-134] p0140 N82-12537 SHELTERS
SEPARATORS Laboratory study for removal of organic sulfur	Earth shelter 2. 1979-1980 USC series [CONF-800438] p0006 N82-10277
from coal [DE81-025132] Development of battery separator composites	SHIRLDING The effect of shielding on the aerodynamic performance of Savonius wind turbines
[NASA-CR-165508] p0157 N82-11547 SERVICE LIFE	p0125 A82-11826 SHIPS
Introduction to solar materials science p0037 A82-10008 Effect of depth of discharge on cycle life of	A design for an MHD power plant as a prime mover for a Naval Vessel [AIAA PAPER 81-2575] p0129 A82-14032
near-term fatteries p0153 A82-11714	SHORT CIRCUITS Temperature dependence of the short-circuit
Ampere-hour integrator tattery charge controller p0153 A82-11737 Life-testing of 1.7 kW h zinc-chloride battery	current in MIS solar cells p0052 A82-12825 SHROUDED TURBINES
system - Cycles 1 - 1000 p0155 A82-18498	Computational analysis of diffuser-augmented wind turbines
SERVICE MODULES Modular hydro dam approach to the economic development of ultra low-head hydropower	p0132 A82-16743 SILANES Introduction to basic aspects of plasma-deposited
[DE81-027817] p0019 N82-12635 SEWAGE TREATMENT	amorphous semiconductor alloys in photovoltaic conversion
Interactive model to assess economics of anaerobic digestion of the farm [DE82-000452] p0110 N82-12620	p0039 A82-10026 Carrier-collection efficiencies in amorphous hydrogenated silicon Schottky-barrier solar cells p0042 A82-11185
Parallel evaluation of air-and oxygen-activated sludge [PB81-246712] p0034 N82-15633	Impurity effects in a-Si:H solar cells [DE81-025069] p0069 N82-11575
SHALE OIL Application of HTGR process heat to oil shale retorting	SILICA GLASS Optical degradation of antireflective silica film on solar collector windows
p0090 A82-11851 Jet fuel locks to shale cil: The 1980 technology	p0041 A82-10836
review [AD-A104414] p0100 N82-11228	V205-Si photoVoltaic cells p0051 A82-12824
Assessment of oil-shale technology in Brazil [DE81-027574] p0010 N82-11249 Geology of the nahcolite deposits and associated	Amorphous silicon bibliography - Introduction p0053 A82-13737 High efficiency inversion layer solar cells on
oil shales of the Green Biver Formation in the Piceance Creek Basin, Colorado	polycrystalline silicon by the application of silicon nitride
p0105 N82-11683 Investigation of factors affecting the in-situ combustion retorting cf cil shale [DE82-000482] p0106 N82-12200	p0058 A82-16127 Thin-film polycrystalline cadmium telluride solar cells and large-area polycrystalline silicon solar cells
Evaluation of shale oil as a utility gas-turbine fuel	p0062 N82-10490 The effects of impurities on the performance of
[DE81-904234] p0107 M82-12251 Meteorological and climatological investigation: Roylew of January - June 1980 investigative period	silicon solar cells [NASA-CH-164945] p0067 N82-11548 A Module Experimental Process System Development
[DE81-030740] p0111 N82-12731 Identification and toxicity of fractionated-shale-oil components [DE81-028460] p0021 N82-12766	Unit (MEPSDU) [NASA-CE-165014] Plat-plate solar array project. Task 1: Silicon material: Investigation of the
Solar-central-receiver fuels and chemicals [DB82-000941] p0077 N82-13530	hydrochlorination of SiC1sub4 [NASA-CR-165042] p0078 N82-14631
Design and test of two-step solar cil shale retort [DE82-000964] p0077 N82-13543 Development of superior denitrogenation and	SILICON ALLOYS Progress in large area photovoltaic devices based on amorphous silicon alloys
isomerization catalysts for processing crude oil derived from shale, part 1	p0049 A82-11855 Amorphous boron-silicon-hydrogen alloys for
[AD-A105667] p0113 N82-14317 SHALES Aluminum recovery from fly ash and shale-retort	thin-film heterojunction solar cells [DE81-027254] p0068 N82-11558 Impurity effects in a-Si:H solar cells
wastes [DE81-027675] p0099 N82-11154	[DE81-025069] p0069 N82-11575

SILICON CARBIDES	Siting and land-use considerations in wind energy
Characteristics of CVD silicon carbide thermionic converters	development [AIAA PAPER 81-2541] p0003 A82-14009
p0124 A82-11821	Preliminary design study of underground pumped
SILICON COMPOUNDS Stability of n-i-p amorphous silicon solar cells	hydro and compressed-air energy storage in hard rock. Volume 5: Site selection
p0043 A82-11343	[DB81-028199] p0156 N82-10529
SILICON PILMS Low cost silicon-on-ceramic photovoltaic solar cells	Analysis of data from the US Department of Energy's meteorological validation program
p0059 A82-17098 SILICON JUNCTIONS	[DE81-030100] p0097 N82-10655 Low/medium-Btu coal-gasification assessment
Efficient Si solar cells by low-temperature	program for specific sites of two New York
solid-phase epitaxy p0043 A82-11344	utilities [DE81-025518] p0101 N82-11240

SPACE SHUTTLE PAYLOADS SUBJECT INDEX

SPACE SHUTTLE PAYLOADS	Thermionic application for future air force space
Solar power satellite system energy talance p0050 A82-12509	power systems p0124 A82-11822
Highlights of 1981 activities [NASA-NEWS-RELEASE-81-199] p0161 N82-15008	Advanced high temperature thermoelectrics for space power
SPACE SHUTTLES	p0125 A82-11823
Power management of multi-hundred kilowatt spacecraft power systems	'Thin foil cells - A challenge for space array designers'
p0046 A82-11769	p0049 A82-11842
Highlights of 1981 activities [NASA-NEWS-RELEASE-81-155] p0161 N82-15008	A technological approach towards future large solar arrays
SPACE SIMULATORS Solar concentrator panel and gore testing in the	p0055 A82-14446 Space nuclear safety and fuels program
JPL 25-foot space simulator [AIAA PAPER 81-2534] p0054 A82-14005	p0111 N82-12921 Space applicable DOE photovoltaic technology: An
SPACE TRANSPORTATION Satellite power system: Concept development and	update [NASA-CR-165021] p0076 N82-13491
evaluation program. Volume 7: Space transportation	SPACECRAFT PROPULSION Heat pipes for NEP spacecraft radiators
[NASA-TM-58238-VCL-7] p0078 N82-14635	p0122 A82-11748
SPACE TRANSPORTATION SYSTEM	Honimaging concentrators for photovoltaic arrays
Transportation systems and cost comparison for	in space
launching an SPS into geosynch. orlit p0050 A82-12507 SPACECRAFT	p0046 A82-11761 Space applicable DOE photovoltaic technology: An nodate
SPACECRAFT Satellite power system: Concept development and evaluation program. Volume 7: Space	update [NASA-CR-165021] p0076 N82-13491 SPACECRAFT RADIATORS
transportation [NASA-TM-58238-VCL-7] p0078 N82-14635	Heat pipes for NEP spacecraft radiators p0122 A82-11748
SPACECRAPT DESIGN	SPACBLAB
High performance silicon solar arrays employing	International Scientific Conference on Space,
advanced structures p0045 A82-11758	21st, Rome, Italy, March 25, 26, 1981, Proceedings p0050 A82-12501
SPACECRAFT LAUNCHING	SPACETERNAS
Transportation systems and cost comparison for	SPS large array simulation
launching an SPS into geosynch. orbit	p0071 N82-12540
Highlights of 1981 activities [NASA-NEWS-RELEASE-81-199] p0161 N82-15008	Solar project at Almeria nears completion p0075 N82-12647
SPACECRAFT POWER SUPPLIES	SPECTRAL BHISSION
Development status of a regenerative fuel cell system for orbital operation	The emissivity of metals frequency and temperature dependence calculations for solar
p0153 A02-11707 A spacecraft thermophotovoltaic power source with	collector design p0038 A82-10014
thermal storage p0044 A82-11711	SPECTRAL REPLECTANCE Solar mirror materials - Their properties and uses
The nickel-hydrogen battery system - An historical overview	in solar concentrating collectors p0037 A82-10012
p0153 A82-11735 High power sclar array switching regulation p0045 A82-11736	The effect of soiling on solar mirrors and techniques used to maintain high reflectivity p0037 A82-10013
Ampere-hour integrator battery charge controller p0153 A82-11737	Optical degradation of antireflective silica film on solar collector windows
Series vs. shunt regulators for power control in satellite power systems	p0041 A82-10836 An integrating sphere based on absolute method for
p0045 A82-11738 Satellite power systems /SFS/ energy conversion	measuring solar absorptance p0058 A82-16247
and power management p0045 A82-11742 Projecting development testing of the GPHS-RTG	Metallurgical analysis and high temperature degradation of the black chrome solar selective
Engineering development testing of the GPHS-RTG converter General Purpose Heat	absorber p0060 A82-17252
Source-Radioisotope Thermoelectric Generator for	SPECTRAL SENSITIVITY Rundamental limits to the spectral selectivity of
Galileo orbiter power supply p0122 A82-11752	Fundamental limits to the spectral selectivity of composite materials for absorbing solar
Modular isotopic thermcelectric generator p0122 A82-11753	radiation p0038 A82-10015
Advances in space rower research and technology at the National Aeronautics and Space Administration	Composite film selective-absorbers for solar radiation collection
p0122 A82-11755 High- and low-resistivity silicon solar cells	p0038 A82-10016 Present state of research on selective coatings
p0046 A82-11762 Solar cell development for the Power Extension	for solar-energy converters p0039 A82-10387
Package p0046 182-11763	Spectrally selective copper sulphide coatings p0040 A82-10468
Gallium arsenide sclar cells-status and prospects for use in space	Solution grown PbS/CdS multilayer stacks as selective absorbers
p0046 A82-11765 Gals solar cells for space application	p0041 A82-10472 Combined solar-energy converters with selective
p0046 A82-11766 Power management of multi-hundred kilowatt	coatings p0044 A82-11424
spacecraft power systems p0046 A82-11769	Efficiency of selective surfaces for solar thermal collectors
The evaluation of four solar-array-powered multi-kW power conditioners for Space Shuttle	p0044 A82-11425 SPECTROSCOPIC AFALYSIS
Orbiter application	Development and application of analytical
p0046 A82-11772	techniques to chemistry of donor solvent
Multijunction high voltage concentrator solar cells p0047 A82-11796	liquefaction [DE81-025961] p0099 #82-11167

Zn3P2 as an improved semiconductor for
photovoltaic solar cells
[DE81-025587] p0069 M82-11577

ZINC-CHLORIBE BATTERIES
Life-testing of 1.7 kW h zinc-chloride battery
system - Cycles 1 - 1000

p0155 A82-18498

ZIRCONIUM COMPOUNDS
Solar selective properties and high temperature
stability of CVD ZrB2

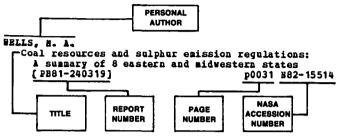

p0057 A82-16055

PERSONAL AUTHOR INDEX

ENERGY / A Continuing Bibliography (Issue 33)

APRIL 1982

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

AMODT, B. Relaxation of geothermal-reservoir stresses induced by heat production [DE81-032024]

D0105 N82-11715 ABBATIBLEO, L. A.
Seasonal performance factors for active solar

systems and heat-pump systems [DE81-028569] p0074 N82-12625

ABDELKHIM, M.
A practical method of analysis of the

current-voltage characteristics of solar cells p0051 A82-12823

Thin-film polycrystalline cadmium telluride solar cells and large-area rclycrystalline silicon solar cells

D0062 N82-10490

ABDURAKHMANOV, A. Efficiency of selective surfaces for solar thermal collectors

p0044 A82-11425 ABDURAKHMANOV, B. M.
Production and certain properties of photoelectric

cells based on silicon epitaxial structures p0053 A82-13716 ABHAT, A. Development of a modular heat exchanger with

integrated latent heat energy store [BMFT-FB-T-81-050]

ABOU-ZEID, M. R. A simplified method for direct calculation of the annual load fraction of solar systems for space heating

Rechargeable lithium/vanadium oxide cells utilizing 2Me-THF/LiAsF6 p0154 A82-15726

ACHILOV. B. M. Method for calculating the unsteady temperature conditions of the generator in a solar

refrigeration system p0056 A82-15642

High performance silicon solar arrays employing advanced structures

D0045 A82-11758 ADAMS, M. A. Fracture mechanics of cellular glass [NASA-CR-164959] p0066 N82-11209 ADAMS. R. C. Demonstration of Wellman-Lord/Allied Chemical PGD Demontration test second year results technology: [PB81-246316] D0034 N82-15626

AGARWAL, A. K.
Pricetown 1 underground coal gasification field test: Operations report [DE81-025162]

AGNIHOTRI, O. P. Spectrally selective copper sulphide coatings p0040 A82-10468

AHMAD, J.
Evaluation of organic acids as fuel cell electrolytes

p0127 A82-12938

Performance of a small low speed Darrieus type rotor p0136 A82-18328

AIMAN. W. R. Solar coal-gasification reactor for hydrocarbon-free synthesis gas

p0067 N82-11247 [DE81-026600] Design and test of two-step solar oil shale retort [DE82-000964] p0077 N82-13543

AKHMEDOV, P. A. Investigation of the possibility of using inexpensive concentrating systems in the modules of a photoelectric station

p0052 A82-13713

AKINS. R. B. Wind ripple analysis [AIAA PAPER 81-2580]

p0129 A82-14033 Wind ripple analysis p0138 N82-11044

[DE81-030129] ALDEN, D. R. Pield demonstration of the conventional steam drive process with ancillary materials [DE81-026849] p0115 N8:

p0115 N82-14522 ALDIS, D. F.

Solar-supplemented, natural air drying of shelled corn: The economic limitations
[PB81-235681] p0
ALDRICH, J.
Hot dry rock geothermal prospects, 1981 p0079 N82-14668

p0119 N82-15559 [DE81-025305] ALI, A. P.

Optical diagnostic techniques for coal-fired MHD applications [AÎAA PAPER 82-0377] p0135 A82-17913

Typical Contract Number Index Listing

tings in this index are arranged alphanumerically by contract number, der each contract number, the accession numbers denoting documents t have been produced as a result of research done under that contract arranged in ascending order with the AIAA accession numbers appearing to the accession number denotes the number by which the citation is intified in either the IAA or STAR section.

ENERGY / A Continuing Bibliography (Issue 33)

APRIL 1982

Typical Report / Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The page number indicates the actual page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA

University of California, Berkeley

COLORADO

University of Colorado, Boulder

DISTRICT OF COLUMBIA

Library of Congress

GEORGIA

Georgia Institute of Technology, Atlanta

ILLINOIS

The John Crerar Library, Chicago

MASSACHUSETTS

Massachusetts Institute of Technology, Cambridge

MISSOURI

Linda Hall Library, Kansas City

NEW YORK

Columbia University, New York

OKLAHOMA

University of Oklahoma, Bizzell Library

PENNSYLVANIA

Carnegie Library of Pittsburgh

WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an '*' following the accession number) are also received by the following public and free libraries:

CALIFORNIA

Los Angeles Public Library San Diego Public Library

COLORADO

Denver Public Library

CONNECTICUT

Hartford Public Library

MARYLAND

Enoch Pratt Free Library, Baltimore

MASSACHUSETTS

Boston Public Library

MICHIGAN

Detroit Public Library
